## Series 2. Governance / Administration, 1739-1986, undated

### General

Series A includes a variety of materials related to the governance and administration of the Library Company.

Generally speaking, most of the records are to be found in subseries 2A.

If the records were obviously about real estate matters, for instance deeds or records related to rent, they have been grouped in subseries 2B. In some cases, records in subseries 2B are related to properties that were eventually owned by LCP, but the records themselves predate LCP's ownership. (i.e. deeds from prior owners).

Series 2C are for documents directly related to the James Rush bequest.

In cases where records touch on more than just that subseries, I've erred on the side of leaving them in subseries 2A.

## Subseries 2A. Administrative Records, 1731-1986, undated
