

General

Formerly part of Things Left in Books collection.

Subseries 4B. Bookplates, circa 1746-1960, undated

Scope and Contents

This subseries includes the Library Company's collection of loose bookplates, some of which had previously been stored in a scrapbook. Some bookplates were printed and used by the Library Company or other related subscription libraries like the Loganian Library or Union Library Company, but a significant number of bookplates were simply collected by Library Company staff in the late 19th and early 20th century. This subseries also includes a small amount of correspondence related to bookplate exchanges.

The bookplates are arranged alphabetically. The Library Company bookplates were grouped and assigned particular styles by the processing archivist.

Some Loganian Library bookplates include accession numbers (Box 24, Folder 15), indicating that they were removed from existing collection materials.
