

of the Plague. By *John Pointer*, A. M. 1738. Bound up with the History of Servetus, burnt alive in Geneva for Heresy. London, 1724.

35. *The History of America*, from the first Discovery thereof. Collected from the Original Relations sent to the King of Spain. By *Antonio de Herrera*, Historiographer to the King of Spain. Translated into English by Capt. *John Stevens*. London, 1726.

36. *Doctor Allen's Synopsis Medicinæ*; or, A brief and general Collection of the whole Practice of Physick. Containing the Opinions and Judgments of the most celebrated Authors concerning Diseases, their Causes and Remedies; with most Cases in Surgery; and some Observations very rare and uncommon; and a curious Treatise of all Sorts of Poisons. London, 1730.

37. *Fossils of all Kinds*, digested into a Method suitable to their mutual Relation and Affinity; with the Names by which they were known to the Antients, and those by which they are at this Day known; and Notes conducing to the setting forth the Natural History, and the main Uses of some of the most considerable of them. As also several Papers tending to the further Advancement of the Knowledge of Minerals, of the Ores of Metals, and of all other subterraneous Productions. By *John Woodward*, M. D. late Professor of Physick at Gresham College, Fellow of the College of Physicians and the R. S. of London. 1728.

38. *An Account of several Work Houses for employing and maintaining the Poor*; setting forth the Rules by which they are governed, their great Usefulness to the Publick, and in particular to the Parishes where they are erected. As also of several Charity-Schools for promoting Work and Labour. 2 Edition. London, 1732.

39. *Physico-Mechanical Experiments on various Subjects*; with Explanations of all the Machines (the Figures of which are curiously engraved on Copper) used in making the Experiments. By *F. Hawksbee*, F. R. S. 1719.

40. *A Dissertation of the true Cithifus of the Antients*; shewing that it may be successfully made Use of for the Improvement of the most dry, barren and hilly Land: Also an Account of the great Profits that may arise from sowing Lucerne, and burning of Clay. With a Catalogue of the best Seeds, and the Season of sowing them. By *J. Switzer*. 1731.
