

The building is in the form of a parallelogram, extending east and west 1,880 feet in length, and north and south 464 feet in width.

The larger portion of the structure is one story in height, and shows the main cornice upon the outside at 45 feet above the ground, the interior height being 70 feet. At the centre of the longer sides are projections 416 feet in length, and in the centre of the shorter sides or ends of the building are projections 216 feet in length. In these projections, in the centre of the four sides, are located the main entrances, which are provided with arcades upon the ground floor, and central facades extending to the height of 90 feet.

The *East Entrance* will form the principal approach for carriages, visitors being allowed to alight at the doors of the building under cover of the arcade.

The *South Entrance* will be the principal approach from street cars, the ticket offices being located upon the line of *Elm Avenue*, with covered ways provided for entrance into the building itself.

The *Main Portal* on the north side communicates directly with the *Art Gallery*, and the *Main Portal* on the west side gives the main passage way to the *Machinery* and *Agricultural Halls*.

Upon the corners of the building there are four towers 75 feet in height, and between the towers and the central projections or entrances, there is a lower roof introduced showing a cornice at 24 feet above the ground.

In order to obtain a central feature for the building as a whole, the roof over the central part, for 184 feet square, has been raised above the surrounding portion,
