

# Dr. D. JAYNE'S FAMILY MEDICINES.

THESE Medicines are prepared with great care, and expressly for family use, and are so admirably calculated to preserve health and remove disease, that no family should ever be without them.

They are composed from some of my original prescriptions during a long practice, without the most distant idea of extending them beyond those limits; but in consequence of the astonishing success attending their use in removing the diseases for which I recommended them, they became very popular, and were called for again and again, so that I found it necessary to prepare them in much larger quantities, in order to meet the constant demand for them. This demand has been continually increasing ever since, until there is now scarcely a town or hamlet on this Continent in which they are not used to a greater or less extent. Besides, immense quantities are annually ordered from the West India Islands, and from the British and Spanish possessions in the East Indies.

I would here take occasion to remark, that I was a Student of one of the best Medical Institutions in the United States, (the University of Pennsylvania,) and have now had nearly thirty years' experience in an extensive and diversified practice, by which I have had ample opportunities of acquiring a knowledge of diseases, and the remedies best calculated to remove them.

The public have therefore a guarantee, that these preparations are carefully compounded upon scientific principles, by one thoroughly acquainted with the medicinal qualities and effects of each article separately, and of their combined influence when chemically united—and one also who has a perfect knowledge of the structure of the Human System, and of the functions of each organ, both in their healthy and diseased condition.

I can therefore recommend these preparations with the greatest confidence, and am fully persuaded from past experience, that they will give very GENERAL, if not UNIVERSAL SATISFACTION; but at the same time I do not pretend to assert that they are "CURE-ALLS," nor that they are in all cases, and under all circumstances, absolutely infallible. Yet I can truly say, that I am unacquainted with any combination of medicines which have been so uniformly successful in removing the various diseases for which I have severally recommended them; and I hereby assure the public, that they need not fear either to use or recommend them, as they will, in an eminent degree, perform all that is stated in the directions accompanying each article.

The popularity of these "Family Medicines" is not confined to the illiterate and credulous, but innumerable persons of intelligence and character, occupying the most prominent stations in society, too honest to impose upon others, and too sagacious to be imposed upon themselves, not only use but recommend them in the highest terms of praise for the uniformity of their success in subduing diseases. They are now regularly prescribed in all the Hospitals on the Island of Cuba, and from six Professors of those institutions I have received certificates; but it is unnecessary to particularize cases, for I am daily in the receipt of letters from every quarter, which, if they do not inform me of some extraordinary cure, at least contain the following sentence: "Your Medicines give universal satisfaction to all who have used them."

The frequent impositions upon the community by the miserable and too often poisonous preparations of ignorant and unprincipled pretenders, admonish me not to expect that confidence will be placed in my assertions by those who are unacquainted with me, or of my standing in society.

I, therefore, most earnestly desire and recommend all, to carefully read and examine for themselves the truth or falsity of my assertions.

## Dr. D. JAYNE'S FAMILY MEDICINES

CONSIST OF

### Dr. D. JAYNE'S EXPECTORANT.

This invaluable medicine is daily effecting some of the most astonishing and wonderful cures that have ever been known. All who have used it for Asthma, Cough, Spitting of Blood, Hooping Cough, Croup or Hives, Consumption, Chronic Pleurisy, Hoarseness, Pain and Soreness of the Breast, Difficulty of Breathing, and every other disease of the Lungs and Breast, can and do attest to its usefulness—Bronchitis, a disease which is annually sweeping thousands to a premature grave under the mistaken name of Consumption, is always cured by it. The usual symptoms of this disease (Bronchitis) are Cough, Soreness of the Lungs or Throat, Hoarseness, Difficulty of Breathing, Asthma, Hectic Fever, a spitting of phlegm or matter, and sometimes blood. It is an inflammation of the fine skin which lines the inside of the whole of the wind tubes or air vessels, which run through every part of the Lungs. This Expectorant immediately suppresses the Cough and Pain, subdues the Inflammation and Fever, removes the difficulty of breathing by producing a free and easy Expectoration, so that a cure is soon effected.

It always cures ASTHMA—two or three large doses will cure the Croup or Hives of Children in a few minutes. It immediately subdues the violence of HOOPING COUGH, and effects a speedy cure. Hundreds who have been given up by their physicians as incurable with "CONSUMPTION," have been restored to perfect health by it.

In fact, as a remedy in PULMONARY DISEASES, no medicine has ever obtained a higher or more deserved reputation.

This Expectorant, if given in the commencement of PLEURISY, INFLAMMATION OF THE LUNGS, or in acute RHEUMATISM, in doses so large as to cause a little nausea for some time, (going to bed and covering up warm,) will produce perspiration, which, if continued for two or three hours, will subdue those affections at once.

See Directions—Also, Jayne's Medical Almanac and Guide to Health, in which will be found a Catalogue of Diseases, with directions for their removal, and also Certificates of Cures of the most desperate and hopeless cases, from persons of the highest respectability.
