PATENTEES AND MANUFACTURERS

OF THE

**METALLIC SKELETON ARTIFICIAL LEG,**  
**ANKLE SUPPORTER,**

AND

**IMPROVED ANATOMICAL MACHINERY**

FOR THE

**TREATMENT OF DEFORMITIES.**

The Metallic Skeleton Limb is *light, neat, strong and durable*; it is constructed of steel ribs, and rings or bands, united together upon the principle of a lattice bridge or arch, one piece bracing and sustaining the other, rendering it capable of bearing any required weight; the socket or receptacle of the stump being open below, allows a free circulation of air, keeping it always cool and healthy, thereby preventing ulceration, which is almost invariably the consequence when the stump is confined in air-tight sockets.

The motions of the knee and ankle-joints approach so near to nature as to render it almost impossible to distinguish it from the natural limb; and it can be adapted to every form of amputation, and worn without the least difficulty.

No stronger proof can be given of its superiority than the fact that it has been examined and approved of by all of the eminent Surgeons and Physicians in Philadelphia and elsewhere, to whom we take pleasure in referring at all times.

The Massachusetts Charitable Mechanics' Association, the American Institute, New York, and the Franklin Institute, Philadelphia, have awarded Silver Medals to YERGER & ORD, for the Skeleton Leg and Deformity Apparatus constructed by them. The public is cautioned against a certain party who is endeavoring in *vain* to *bolster* up his *shackling business* by circulating a *petty species of slander*, which has been justly refuted by an overwhelming patronage from those he expected to win, by pursuing a course too far beneath the *character of a man* for us to notice in detail.

Every information in reference to the Metallic Leg, Ankle Supporter, and Instruments for Deformity, will be given, on application personally, or by letter (post paid,) to No. 7 Phoenix Block, Southwest corner of Second and Dock Streets, Philadelphia.

GEORGE W. YERGER, }  
JOHN F. ORD, } Proprietors.
